SKILLS

- JavaScript
- Python
- SQL Databases
- Node.js
- React
- Redux
- Object Oriented Programming (OOP)
- Data Structures
- Algorithms
- Computer Architecture

PROJECTS AND EXPERIENCE

WEB DEVELOPER | 10/2019 to 12/2019

Miracle Messages

Partnered up with Miracle Messages to work on a new upcoming "Get Involved" application that will be added to the Miracle Messages main page.

- Spearheaded in the Front-End UI using JavaScript React and Mapbox.
- Built the Back-End from the ground up using Node.js and SQL.
- The application (still to be released publicly) is hosted on Heroku.

FRONT END DEVELOPER | 09/2019 to 09/2019

Potluck Planner

Potluck Planner was a week long project aimed to be an easy to use "event planning" app that allowed you to create, plan, connect and share Potluck Parties with your friends.

- GitHub: <https://github.com/potluckplanner/frontend-1>
- Deployed Link: <https://potluck-planner-fe-vishalicious213.madisonmckown.now.sh/features.html>
- Front-End built in JavaScript using libraries such as React, Bootstrap, Semantic-UI, Styled-Components, Axios, Yup, Formik and JQuery.

EDUCATION

Lambda School - Online

04/2020

Lambda School offers a 9 month, full-time Full Stack Web Development program with tracks in Computer Science, Android, iOS, UX, and Data Science. My Full Stack Web Development track included extensive schooling in these languages: JavaScript, Python, SQL, Node.js, React, Redux, HTML, and CSS.
